

**CHAIN COMPATIBILITY AND SELECTION - 4-SPEED GEARING****IMPORTANT INFORMATION**

- It is important that the connecting link CL is compatible with the chain C
- When fitting a new chain, the cassette should also be replaced
- 2 speed and 4 speed chains are not cross compatible
- If the chain is going to be refitted, put the connecting link in a secure place and reuse later.
- If you are unsure of the correct fitting process please consult your Brompton dealer or Brompton Customer Service [support@brompton.co.uk](mailto:support@brompton.co.uk)

**FITTING**

To fit a new chain, measure the old chain with the new one ensuring the new chain is the correct length. See chart below. Fit the new chain by routing it correctly through the rear frame and the derailleur. Do not engage the chain tensioner until after the connecting link have been fitted. Once fitted, we recommend wiping the external surfaces of the chain with a cloth or rag, in order to remove any excess lubricant.
